

Stop clowning around with oil samples.

Introducing the TotalTest kit, a quick, non-messy acid and moisture sample kit.

There's no need to ever take an oil sample again. The TotalTest® kit allows you to check for acid and moisture by simply connecting it to a Schrader fitting. Its chemical crystals react to reveal contamination. That means no shutting down the system and, best of all, no more messy oil samples. The TotalTest 2 kit includes everything you need to test CFC/HCFC and HFC systems including R12, R11, R502, R500 and R410A.
