

PARKER STEEL LIQUID LINE FILTER DRIERS (LLD SERIES)

KEY FEATURES AND BENEFITS

- High moisture and acid capacity. Maximum filtration capacity.
- Exceptional compatibility with new polyolester oils.
- Compatible with all existing and new refrigerants and blends including 134a, 401A/B, 402A/B, 404A, 407A/B/C, 410A, 502, 507A.
- Spring loaded 100% molecular sieve. For 410A, Parker recommends XH11 (consult Parker).
- Solid copper sweat fittings.
- Powder paint exterior coating surpasses 500 hour ASTM salt spray test and resists corrosion.
- Eliminates concern of additive stripping.
- 032 MF liquid line drier features 1/4inch SAE steel flare male inlet and 1/4 inch SAE steel female flare outlet. Consult Parker for other sizes.
- 500 psig design pressure (600 psig available on all models designed for R-410A applications with XH11 desiccant).

- Extended copper ends available (select models).
- Available with other desiccant combinations including charcoal and activated alumina (consult Parker).
- Various inlet/outlet fitting combinations available.
- U.L. listed SA3441, CSA certified LR46423.

P4112

NOTE: For R-410A applications, Parker recommends XH11 desiccant. See pages 9-11 for R-410A drier information.
